

MATCH HISTORY

Telstra Group Limited

FullStack Engineer, Telstra Developer portal - React, TypeScript, HTML/CSS, AWS

2022 - Present

- Developed reusable UI components in React and TypeScript, including a custom searchable dropdown, while identifying opportunities to improve usability and consistency and collaborating with design and product to refine requirements and solutions.
- Review merge requests and perform peer validation testing with developers, challenging assumptions and identifying usability, reliability and security concerns to strengthen implementation quality.
- Collaborate with teams across the organisation to integrate and onboard APIs, developing testing strategies and test data to validate end-to-end flows, troubleshoot issues across systems, and improve platform reliability.

Accenture

UX/Product Engineering Intern - Wireframing, prototyping, and user/accessibility testing

2021

- Designed and prototyped a mobile application to replace paper-based workflows for OH&S inspectors, translating user needs into practical product solutions.
- Conducted user research and usability testing with cross-functional teams, iterating on prototypes based on user feedback to improve the overall experience.

Deloitte

Technology Strategy and Transformations Consultant - Strategic thinking, problem analysis and stakeholder management

2021

- Conducted a post-implementation review of an Emergency Department Information System, critically analysing documentation to identify key insights, synthesise findings and formulate recommendations for improvement.
- Worked closely with the Project Director to analyse complex problems, communicate findings clearly and apply structured consulting frameworks to develop practical solutions.

LORE

UNSW

Bachelors of Computer Science

2017-2021

- **Course Work:** Programming Fundamentals, Data Structures and Algorithms, AI, Cyber Security, Human Computer Interaction (UX/UI) and Full Stack Final Project (using React.js, JavaScript, SQLite3 and HTML/CSS)

CHAMPION ABILITIES

React.js | JavaScript/TypeScript | HTML/CSS | AWS | UX Design | User Research & Usability Testing

SIDE QUESTS

Telstra Women in Tech Social Coding Club Founder

2023 - Present

- Founded and facilitate a fortnightly Social Coding Club for 250+ members, creating a supportive environment for women in tech to learn, collaborate and tackle algorithmic programming challenges together.
- Encourage members to challenge themselves beyond project work while fostering technical confidence, knowledge-sharing and community.

“What’s Your Brewsona?” - Choose your own adventure personality quiz game

In Progress

- Designing and developing a playful choose-your-own-adventure personality quiz that matches users with a café drink based on MBTI traits.
- Combining interactive storytelling, branching decisions and UX design to create an engaging user experience, built with JavaScript and HTML/CSS and hosted on Vercel.

League of Legends fan - Neeko main

2017- Present

- League was the first game I learned, giving me firsthand experience learning gaming terminology and MOBA systems from scratch; now a long-term player with 500,000+ Neeko Mastery.
- Passionate about lowering the barrier to entry for new players, and regularly think about how to make League more approachable when introducing friends to the game, particularly where unfamiliar terminology and systems create friction.
- Follow Riot and the League ecosystem closely, regularly watching MSI and Worlds and keeping up with game updates, developer blogs and changes to the player experience.
